

Improving Productivity through Quality Enhancement and Cost Reduction

Why Attend

How do organizations improve productivity? What is productivity to start with? This course presents best practices on how to boost productivity by focusing on quality and cost saving initiatives. Best practices and tools from organizations that implemented quality methodologies to improve their processes and achieve faster cycle times, lesser defects and simplified operations will be shared with participants. Participants will also learn how to apply these practices in their organizations and understand how to manage change. They will master the skills to leverage the existing culture to their advantage by creating a solid platform and moving the organization into a new mindset. This course is critical for every organization aiming to save cost and become more efficient and productive.

Course Methodology

This course relies on the use of exercises and workshops to engage participants and help them learn new concepts and practices. Group and plenary discussions will be used. Participants will be required to debate and present their findings. Some videos with case studies will be presented as well.

Course Objectives

By the end of the course, participants will be able to:

- Define productivity and various types of organizational waste
- Identify areas of poor productivity due to poor quality and suggest ways to increase effectiveness and efficiency
- Justify and apply quality improvement tools and techniques in order to improve productivity
- Apply several cost reduction strategies in order to meet changing global, statutory and market conditions
- Recognize and apply measuring initiatives and set targets in order to improve productivity

Target Audience

Managers, supervisors and all those who are responsible for, or indirectly involved in, a cost or profit center or a quality improvement function.

Target Competencies

- Problem solving
- Change management
- Applying Quality
- Understanding Cost reduction
- Applying Lean
- Understanding Six Sigma
